14.20	<i>Manage Annual Meetings</i>	73
14.20.1	List Annual Convention Registrations	73
14.20.2	List Annual Meeting price	73
14.20.3	Set Annual Meeting price	75
14.20.4	Set Annual Meeting Registration Date	75
14.21	<i>Manage Event Levels</i>	76
14.21.1	Add Event Level	76
14.21.2	List Event Level	77
14.21.3	Map Event Level	78
15	Membership Management	79
15.1	<i>My Refund</i>	79
15.1.1	Apply Refund	79
15.1.2	List refunds	79
15.1.3	My Refunds	80
15.2	<i>Manage Member Registration</i>	80
15.2.1	List Registered Members	80
15.2.2	New Member Registration	81
15.2.3	Search Members and Users	81
15.3	<i>Manage User Registration</i>	83
15.3.1	List Registered Users	83
15.4	<i>Manage Refund Request</i>	84
15.4.1	Approved Refund Request	84
15.4.2	List All Over Payments	84

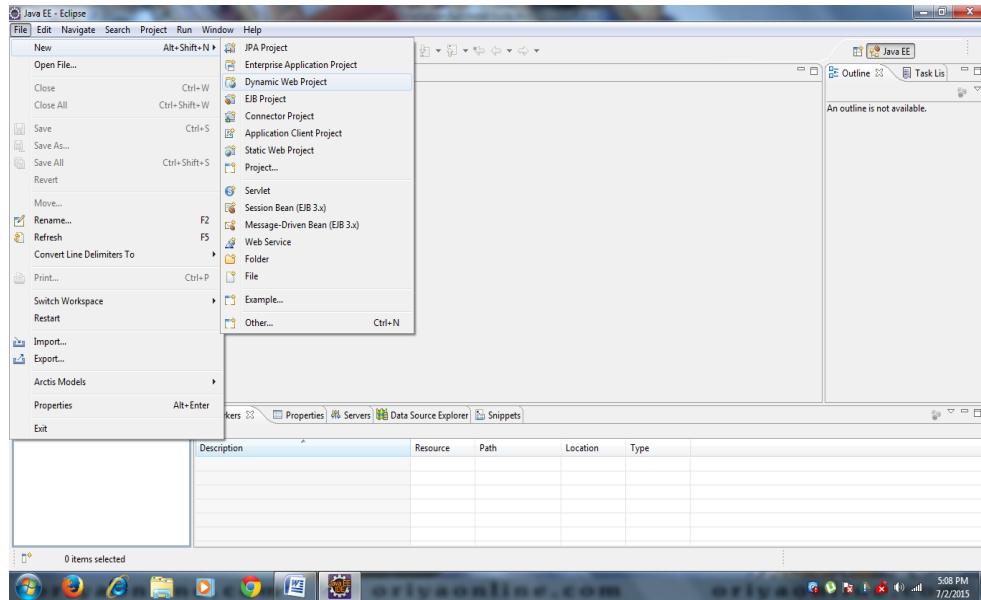

15.4.3	Pending Refund Requests	85
15.5	<i>Manage Membership Types</i>	86
15.5.1	List of Human Members	86
16	Online Entries	87
16.1	<i>OE Result</i>	87
16.1.1	List OE Result	87
16.2	<i>Manage OE Price Items</i>	87
16.2.1	Add New OE Price Items	87
16.2.2	List All OE Price Items	88
16.2.3	List OE Fixed Price Details	89
16.2.4	Set OE Fixed Price Details	89
16.3	<i>Manage Qualification Matrix</i>	90
16.3.1	Create Qualification Validation	90
16.3.2	Map Championship Levels	91
16.3.3	View Qualification Matrix	91
16.4	<i>Event Calendar</i>	92
16.4.1	Search Events	92
16.4.2	View Event Calendar	93
16.5	<i>Manage Provisional Event Calendar</i>	93
16.5.1	Approve Provisional Calendar	93
16.5.2	Create Provisional Calendar	94
17	Process Management	95
17.1	<i>Business Process</i>	95
17.1.1	Business Process Voting List	95
17.1.2	List of Business Processes	96
17.1.3	Move BP Life Cycle Stage	97
18	Report Management	98
18.1	<i>Events</i>	98
18.1.1	View All Report Events	98
18.2	<i>Members</i>	99
18.2.1	View All Membership Report	99
19	Reports	100
19.1	<i>Manage Additional Reports</i>	100
19.1.1	Report List	100
19.1.1.1	Daily sales Report	100
19.1.1.2	Monthly Sales Report	102
19.1.1.3	Yearly Sales Report – Area Wise	103
20	Role Management	104
20.1	<i>Manage Mapping</i>	104
20.1.1	Mapping Entity with Privileges	104
20.1.2	Mapping Privileges with Permission	104
20.1.3	Mapping Role with Entities	105
20.1.4	Mapping Role with entities and Privileges	106
20.2	<i>Privileges</i>	106
20.2.1	Create privileges	106
20.2.2	Edit List of Privileges	107

20.3	<i>Manage Role</i>	108
20.3.1	Assign Roles Securities	108
20.3.2	Assign Roles To User	109
20.3.3	Maintain Roles	110
20.3.4	Mapping Role with Entities	110
20.4	<i>Manage Entity</i>	111
20.4.1	Create Entities	111
20.4.2	View edit List of Entities	112
20.5	<i>Permission</i>	113
20.5.1	Create Permission	113
20.5.2	Edit List of Permission	113
21	Service Management	114
21.1	<i>Web Service</i>	114
21.1.1	BS Voting List	114
21.1.2	List of Business services	115
21.1.3	Move BS Life Cycle Stage	116

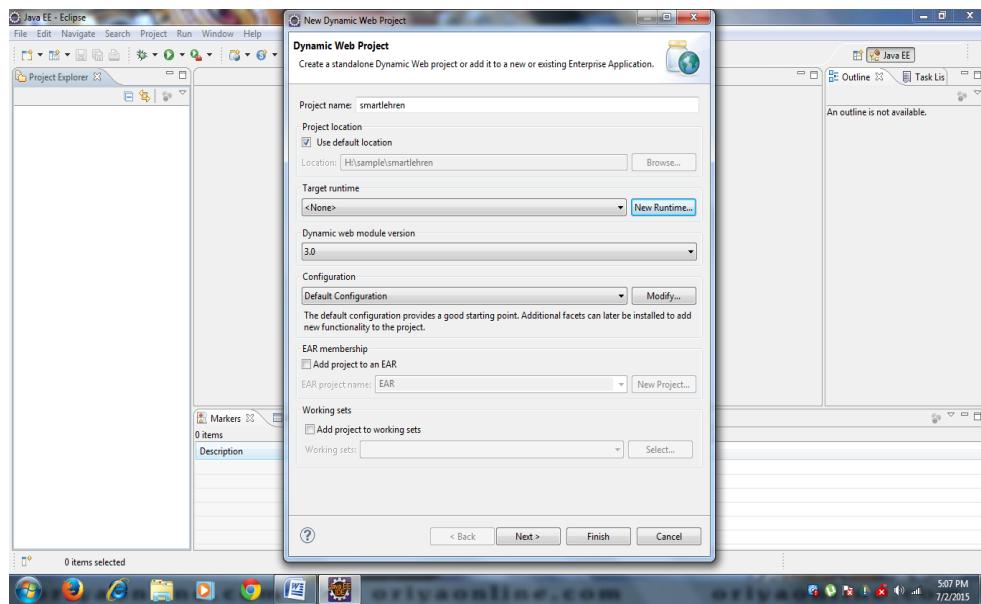

1 Introduction

Following are the steps to create a dynamic web project guildKraft:

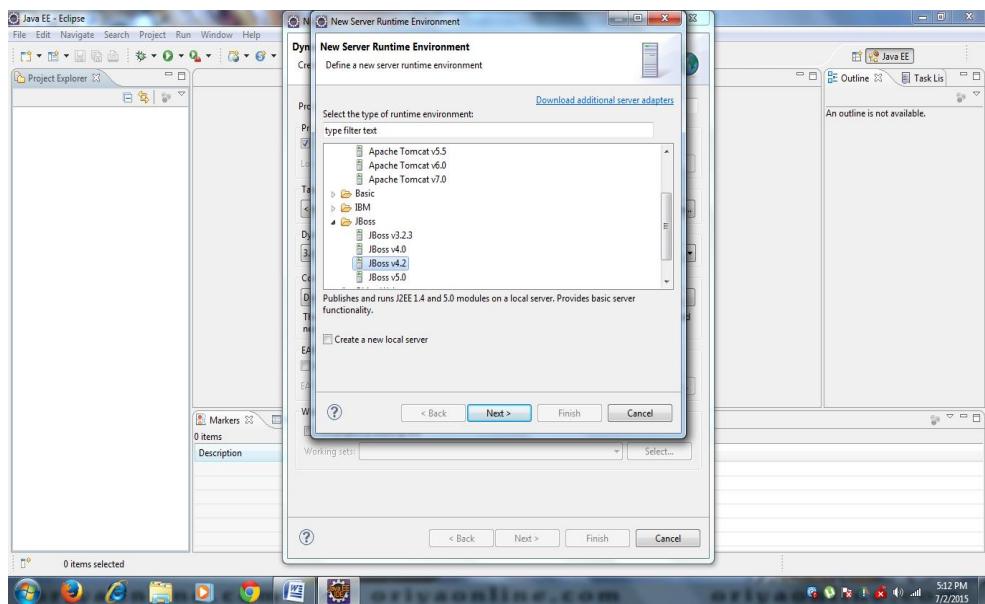

Step 1: Open the eclipse and create Dynamic Web Project. Like this.

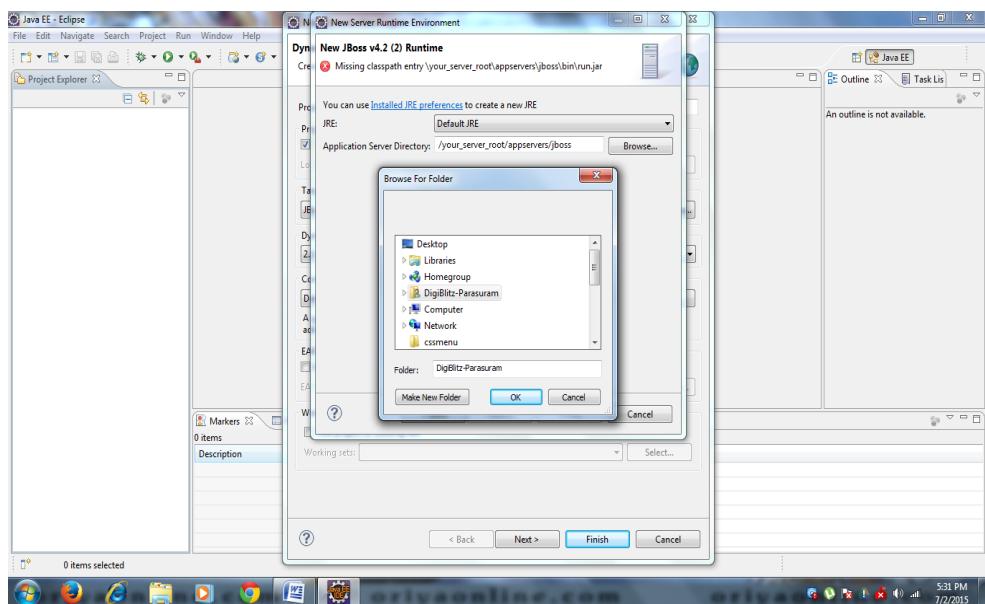

Step 2: Enter project name and set Target run time.

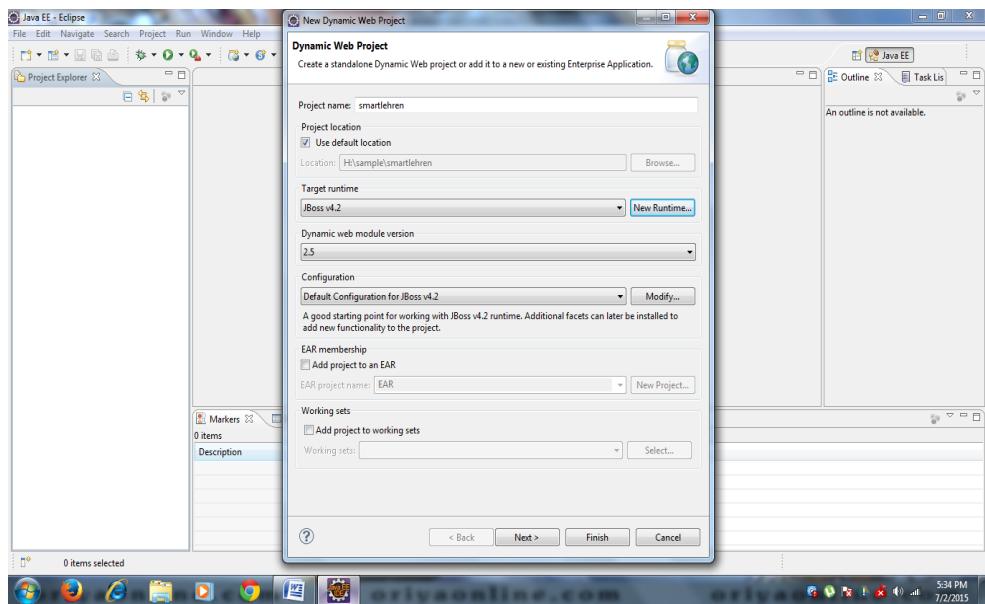

Step 3: if click New Runtime following screen will appear and select JBoss4.2 and click Next Button.

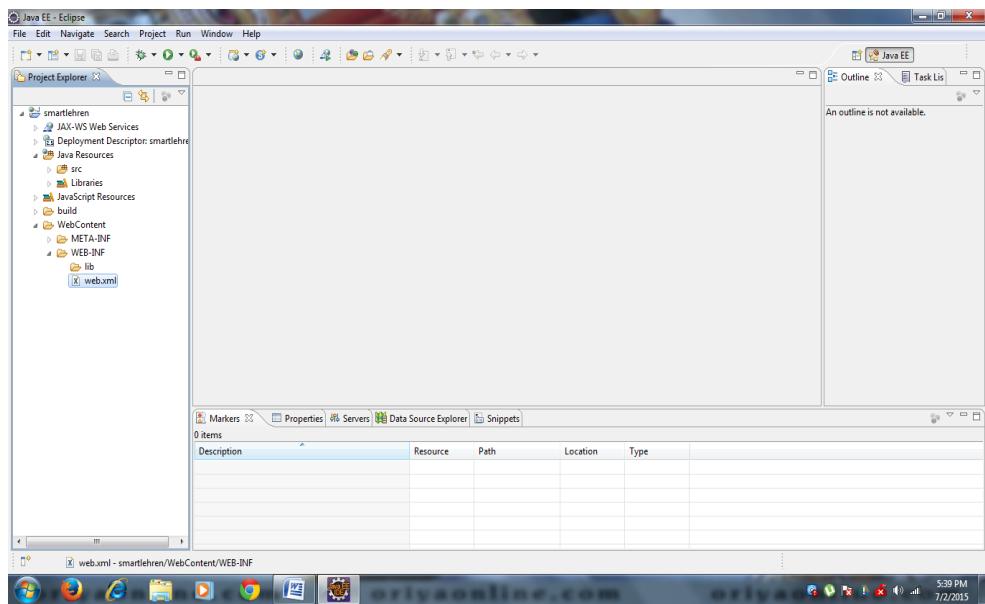

Step 4: Click Browse button and select JBoss folder from your Drive then click finish.

Step 5: After select Runtime screen will be like this and click Finish.

Step 6: Now guildKraft Project work space is ready.

Step 7: Open web.xml file. web.xml file is main important for project. It will handle servlet mapping. Add this following code.

```
<?xml version="1.0" encoding="UTF-8"?>
<web-app id="WebApp_ID" version="2.4" xmlns="http://java.sun.com/xml/ns/j2ee"
  xmlns:xsi="http://www.w3.org/2001/XMLSchema-instance"
  xsi:schemaLocation="http://java.sun.com/xml/ns/j2ee/web-app_2_4.xsd">
  <display-name>Main Application</display-name>
  <servlet>
    <servlet-name>spring</servlet-name>
    <servlet-class>org.springframework.web.servlet.DispatcherServlet</servlet-
class>

    <init-param>
      <param-name>spring</param-name>
      <param-value>/WEB-INF/spring-servlet.xml</param-value>
    </init-param>

    <load-on-startup>1</load-on-startup>
  </servlet>

  <servlet-mapping>
    <servlet-name>spring</servlet-name>
    <url-pattern>*.html</url-pattern>
  </servlet-mapping>

  <welcome-file-list>
    <welcome-file>
      frmHome.jsp
    </welcome-file>
  </welcome-file-list>
</web-app>
```

Step 8: add spring-servlet.xml in WebContent\WEB-INF\... it is Spring MVC Controller

```
<?xml version="1.0" encoding="UTF-8"?>
<beans xmlns="http://www.springframework.org/schema/beans"
  xmlns:xsi="http://www.w3.org/2001/XMLSchema-instance"
  xsi:schemaLocation="http://www.springframework.org/schema/beans
  http://www.springframework.org/schema/beans/spring-beans-2.5.xsd">
```

<bean name="/paypal.html" class="com.paypal.action.PayPalAction"/>
<bean name="/signUp.html" class="com.login.action.GldSignUpAction"/>

<!--bean name="/jbpmProcess.html" class="com.sample.Test"-->
<bean id="viewResolver"
      class="org.springframework.web.servlet.view.InternalResourceViewResolver">
    <property name="viewClass"
      value="org.springframework.web.servlet.view.JstlView"/>
    <property name="prefix" value="/jsp//>
    <property name="suffix" value=".jsp"/>
  </bean>

<!--bean id="mailSender"
      class="org.springframework.mail.javamail.JavaMailSenderImpl">
    <property name="host" value="smtp.gmail.com" />
    <property name="port" value="587" />
    <property name="username" value="dhivya.ab@gmail.com" />
    <property name="password" value="mmbalraaj" />

    <property name="javaMailProperties">

```

```

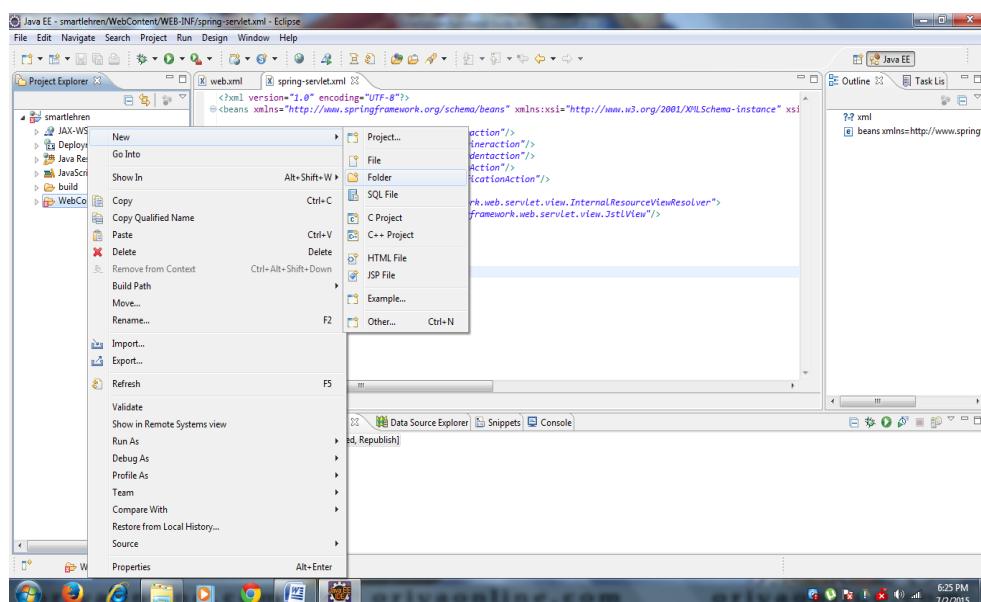

<props>
    <prop key="mail.smtp.auth">true</prop>
    <prop key="mail.smtp.starttls.enable">true</prop>
</props>
</property>
</bean>

<bean id="mailMail" class="com.mkyong.common.MailMail">
    <property name="mailSender" ref="mailSender" />
</bean-->

</beans>

```

Step 9: Create jsp folder in WebContent like this

Step 10: Create *.jsp file in jsp folder for home page. This jsp file need to set in web.xml like this. Example login page.

```

<welcome-file-list>
    <welcome-file>
        jsp/frmHome.jsp
    </welcome-file>
</welcome-file-list>

```

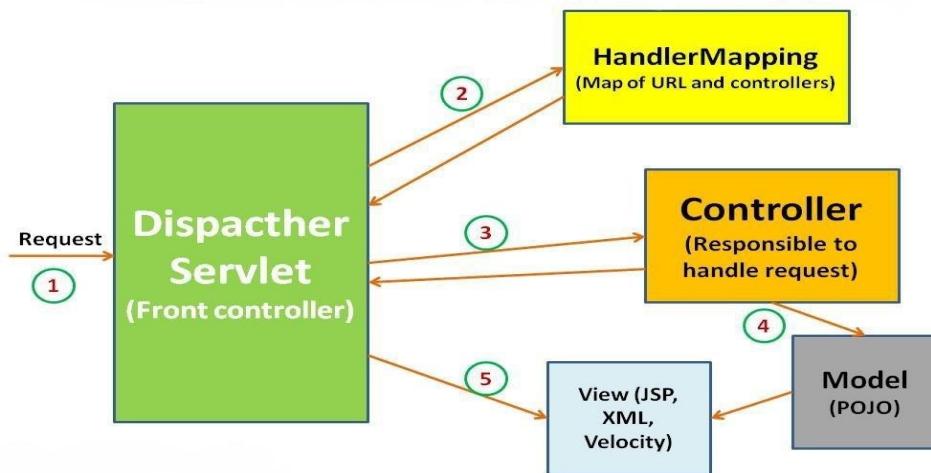

Step 11: Home page will display. You can do login, if already registered and also user register in this page. If you click register button following screen will display. This action will occur from home.jsp

You should enter mandatory fields and click Register button. This home.jsp contain form action login.html. Servlet will pass login.html to spring controller, then spring controller will handle action class.

```
<bean name="/login.html" class="com.login.action.KlgLoginAction"/>
```

Here spring controller will call Loginaction.java under the com. spring package. Loginaction.java will do process. All input data will pass from login action to database through using this method db. Usercreate (username,password,firstname,.....); db.usercreate() method will explored in userDB.java under the com.util package. userDB.java will save all data in tbluserMasterl table in database.

Spring MVC – Architecture:

2 Registration module

Description: Registration module contain all basic information about user. User should enter all basic information in frmmemberuserRegistration.jsp.

Java: frmmemberuserRegistration.jsp will call klgLoginaction.java file. More than one jsp file can call java class. Java class will identify all jsp page via process name. java class will call method name:
createuser(....,...,...,...)

Database: createuser(....,...,...,...) method name described in userDB.java. here all user data will store in tblUserMaster table under TEST Database.

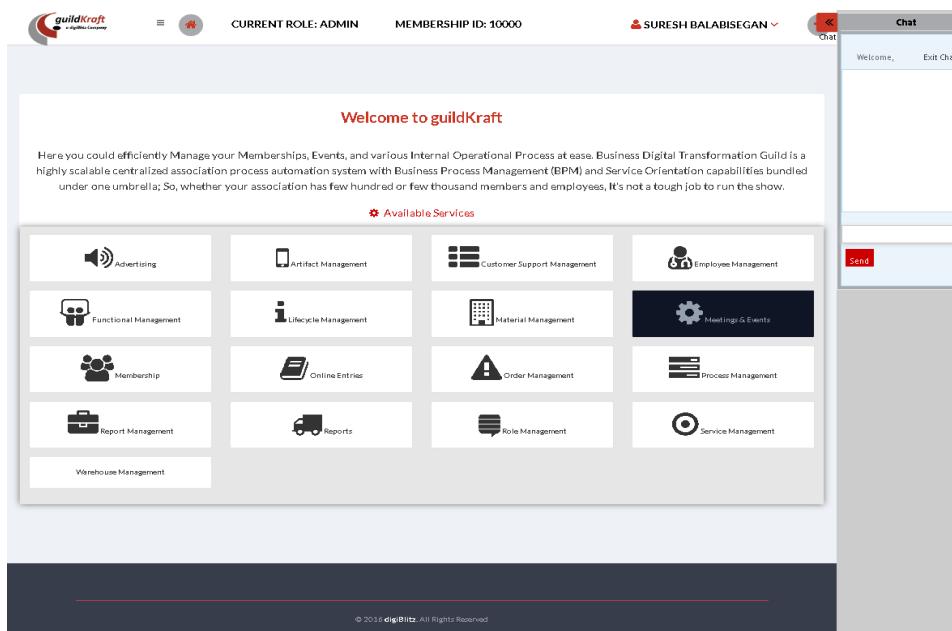

Action	DB File	Table Name
frmmemberuserRegistration.jsp file will call klgLoginAction.java with Process name Register. Action class will find Process name and pass values through this method db.getuser_status (username,password,...) to userDB.java.	GeneralDBAction.java will pass values and store in database Table.	tblUserMaster

3 Login module

Description: will get username and password from user through frmmemberuserRegistration.jsp and check this username and password exist or not in tblUserMaster database table. not existing user cant access this system.

Action	DB File	Table Name
login.jsp file will call klgUserAction.java with event name Process. Action class will find event name and pass values through this method db.getuser_status (username, password) to GeneralDBAction.java.	GeneralDBAction.java will pass values and store in database Table.	tblUserMaster

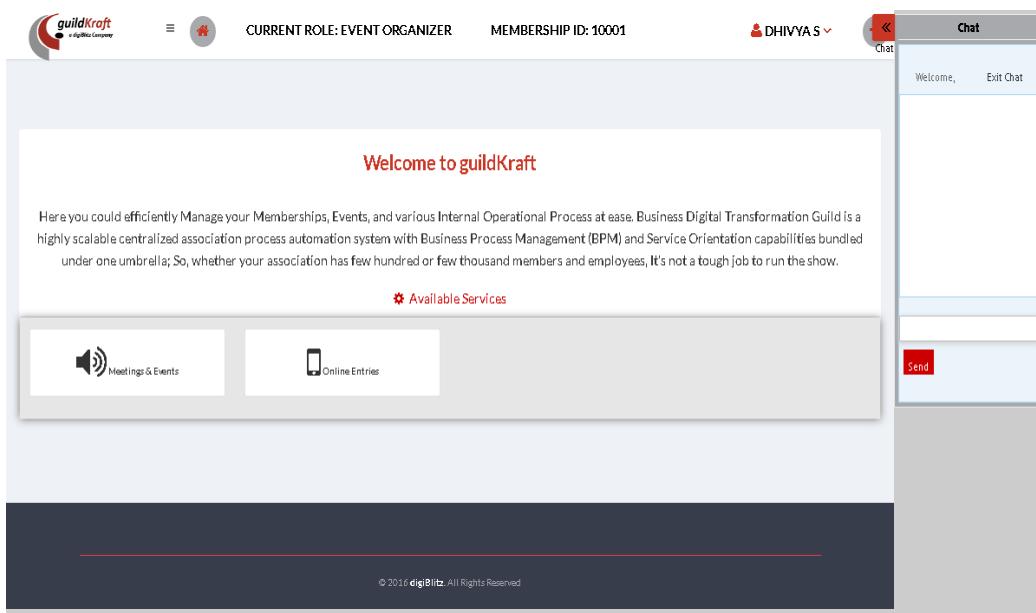

4 Admin Role – Dashboard

Action	DB File	Table Name
frmmemberuserRegistration.jsp file will call klgLoginAction.java with event name Process. Action class will find event name and pass values through this method db.getuser_status (username, password) to GeneralDBAction.java.	GeneralDBAction.java will pass values and store in database Table.	tblUserMaster

5 Event Organizer – Dashboard

This is the dashboard page for Event organizer. They have two permission.

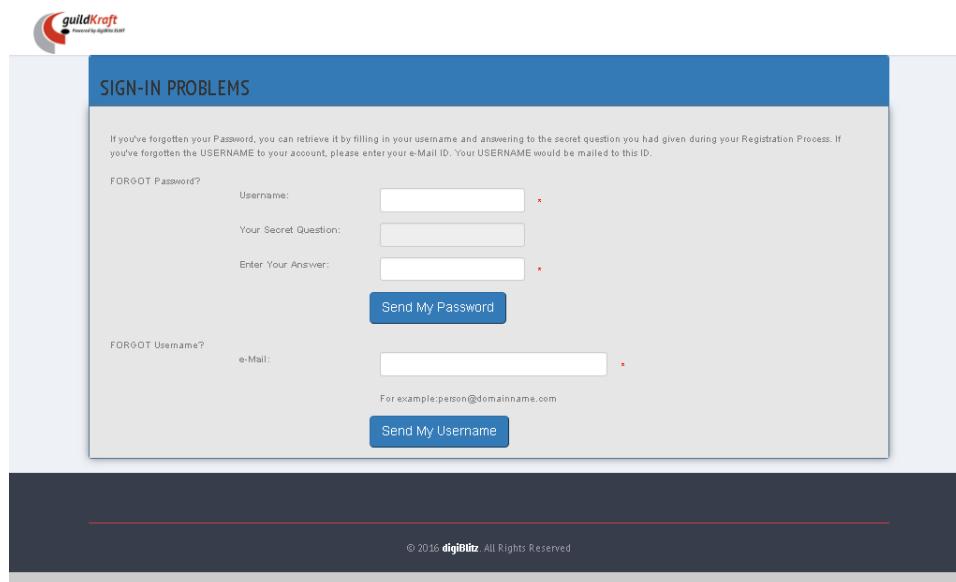

Action	DB File	Table Name
frmmemberuserRegistration.jsp file will call klgLoginAction.java with event name Process. Action class will find event name and pass values through this method db.getuser_status (username, password) to GeneralDBAction.java.	GeneralDBAction.java will pass values and store in database Table.	tblUserMaster

6 Area Chair - Dashboard

Action	DB File	Table Name
frmmemberuserRegistration.jsp file will call klgLoginAction.java with event name Process. Action class will find event name and pass values through this method db.getuser_status (username, password) to GeneralDBAction.java.	GeneralDBAction.java will pass values and store in database Table.	tblUserMaster

7 Forgot Password

If the customer forgets his/her password they cannot access their account. So they can rest their password, by clicking on forgot password button and change their password, so that they can access their account.

Action	DB File	Table Name
frmRolMCreateRole.jsp file will call klgRoleAction.java with event name role . Action class will find event name and pass values through this method db.addrole(role_name); to userDB.java.	userDB.java will pass values and save in database table.	tblrole

8 My Profile

8.1 Edit Profile

Edit the existing registered data of the user

Action	DB File	Table Name
frmEditMemberUserSignUp.jsp file will call KlgUserAction.java with event name edit .	--	--

8.2 Change Password

Action	DB File	Table Name
frmChangePassword.jsp file will call KlgUserAction.java with event name initchgPwd .	GeneralDBAction.java will pass values and store in database Table.	tblSignUpDetails – get details of the user.

8.3 Profile details

Action	DB File	Table Name
profiledetails.jsp file will call KlgUserAction.java with event name profiledetails .	GeneralDBAction.java will pass values and store in database Table.	tblSignUpDetails – get details of the user.

11 Artifact Management

11.1 Manage Framework Level

11.1.1 Artifact Mappings

Select “view point” and select required artifacts and click “Map artifacts” to map the artifacts roles.

The screenshot shows the 'MANAGE ARTIFACT MAPPING' page. At the top, it displays the current role as 'ADMIN' and membership ID as '10000'. On the left, there's a sidebar with 'My Profile' and 'Manage Framework Level' options. The main area has dropdown menus for 'View Points', 'LOBs', 'Views', 'Groups', and 'Domains/Processes', all set to 'Select One'. Below these are several artifact categories with 'Choose Files' buttons: 'Mission&Vision', 'Goals', 'Training', 'Mission&Division test', 'Artifact test', and 'Mission&Divisions'. At the bottom right is a large blue 'Map Artifact' button.

Action	DB File	Table Name
<code>frmArtifactMapList.jsp</code> file will call <code>KlgArtifactAction.java</code> with event name loadArtifact .	GeneralDBAction.java will pass values and save in database table.	tblviewpointmaster gets the value of view. tblMapArtifact stores the mapped values

11.1.2 Group Level Master

In this permission we can add and edit the groups which were already created. We can create new groups.

Action	DB File	Table Name
<code>frmAddListgroups.jsp</code> file will call <code>KlgArtifactAction.java</code> with event name searchList .	GeneralDBAction.java will pass values and save in database table.	tblviewpointmaster gets the value of view. tblMapArtifact stores the mapped values

- On Clicking Add button

Action	DB File	Table Name
<code>frmAddGroups.jsp</code> file will call <code>KlgArtifactAction.java</code> with event name AddGroups .	--	--

11.1.3 Mapping View Point Master

To map with other groups click “view point” and then click “map”.

Action	DB File	Table Name
<code>frmViewPointMapping.jsp</code> file will call <code>KlgArtifactAction.java</code> with event name <code>initArtifactMap</code> .	GeneralDBAction.java will pass values and save in database table.	<code>tblviewpointmaster - get all views</code> <code>tblframeworkmaster - get all groups</code> <code>tblframeworklayermap - get all group details</code>

- On clicking go to list page

Action	DB File	Table Name
<code>frmMappedViewPointList.jsp</code> file will call <code>KlgArtifactAction.java</code> with event name <code>searchMappedGroup</code> .	GeneralDBAction.java will pass values and save in database table.	<code>tblviewpointmaster - get all views</code> <code>tblframeworkmaster - get all groups</code> <code>tblframeworklayermap - get all group details</code>

12 Customer Support Management

12.1 Manage Customer

It has a permission that manage the customer details.

12.1.1 Search

Enter the Customer ID to search for details of that Member.

The screenshot shows the guildKraft application interface. At the top, there is a header bar with the guildKraft logo, a search icon, 'CURRENT ROLE: ADMIN', 'MEMBERSHIP ID: 10000', and a user profile for 'SURESH BALABISEGAN'. Below the header is a sidebar with 'My Profile' and 'Manage Customer' options. The main content area has a blue header 'CUSTOMER ID' with the sub-instruction 'Please Enter Your Customer Id'. It contains a text input field labeled 'Customer Id:' and a blue 'Search' button. At the bottom of the page, there is a footer with the text '© 2016 digiBlink All Rights Reserved'.

Action	DB File	Table Name
<p><code>customersupport.jsp</code> file will call <code>CustomersupportAction.java</code> with event name customer.</p>	<p>GeneralDBAction.java will pass values and save in database table.</p>	<code>tblSignUpDetails</code>

13 Life Cycle Management

13.1 Life Cycle Process

13.1.1 Create Life Cycle Process

To create life cycle process fill the form given below and click “Add/Save Stage”

LIFECYCLE PROCESS: CREATE

Lifecycle	Total Stages	Date of Creation	Created By	Stage	Stage Name	Input	Process	Control	Output	Description
No DATA										

© 2016 digitBIZ. All Rights Reserved

Action	DB File	Table Name
SystinetArtifactadd.jsp file will call KlgHpSystinetAction.java with event name callArtadd.	--.	--

14 Meetings and Events

14.1 Events

14.1.1 View All Event Report

This show the list of Event report , that displays the pictorial representation of the report.

The screenshot shows the GuildKraft application interface. At the top, there is a header with the GuildKraft logo, current role (ADMIN), membership ID (10000), and user name (SURESH BALABISEGAN). On the left, there is a sidebar menu with various administrative options like My Profile, Events, Manage Event Registrations, etc. The main content area is titled 'NUMBER OF EVENTS CONDUCTED YEAR WISE'. It contains fields for 'From Date' and 'To date' with calendar icons, a dropdown for 'Report type' set to 'Graphical', and a checkbox group for 'Graph types' with 'Pie' checked. Below these are 'Submit' and 'Cancel' buttons. At the bottom of the page, there is a footer with the text '© 2016 digitiz. All Rights Reserved'.

- `createEventReports.jsp` file will call from `G1dkfEventReport.java` with event name eventsYearWise.
- On Clicking the submit button, views the pictorial representation.

Action	DB File	Table Name
<code>generateYearlyEventsReports.jsp</code> file will call from <code>EventReports.java</code> with event name eventsYearWise.	--	--

14.2 Manage Event Registrations

14.2.1 Event Requests

Click “Status” button to see the current status of the request whether it is, pending, approved, rejected requests.

The screenshot shows a web application interface for managing event registrations. At the top, there's a navigation bar with the guildKraft logo, user information ('CURRENT ROLE: ADMIN', 'MEMBERSHIP ID: 10000', 'SURESH BALABISEGAN'), and a 'Chat' section. The main content area is titled 'MEETINGS/ENDORSEMENT APPLICATION LISTINGS'. It features a table with columns: 'Event ID', 'Organizer ID', 'Event Title', 'Date of Registration', 'View', and 'Approve'. A dropdown menu under 'Status' is set to 'Pending'. The table contains one row of data. At the bottom left, there's a footer with the text '© 2016 digitize. All Rights Reserved.'

Action	DB File	Table Name
<p><code>frmMeeAdminEventListings.jsp</code> file will call from <code>ActionEventOrgRenewal.java</code> with event name <code>eventViewAdmin</code>.</p>	--	--

14.2.2 List Event Requests

To see the list of event requests click “year” and “Select one” then click “submit” button.

The screenshot shows a web application interface for managing online event entries. At the top, there's a navigation bar with the guildKraft logo, user information ('CURRENT ROLE: ADMIN', 'MEMBERSHIP ID: 10000', 'SURESH BALABISEGAN'), and a 'Chat' section. The main content area is titled 'ONLINE EVENT ENTRIES'. It features a search bar for 'Year' (set to 2016) and 'Area' (set to Area III). Below the search bar is a 'Submit' button. The main area displays a table of events with columns: 'Event Date', 'Event Title', 'Organizer Name', 'Area Code', 'Location', 'Edit/Approve', and 'Omnibus Listing'. The table lists several events, each with an 'Edit/Approve' and an 'Update' button. At the bottom left, there's a footer with the text '© 2016 digitize. All Rights Reserved.'

Action	DB File	Table Name
<code>frmProCalUseaStaffList.jsp</code> file will call <code>OnlineEntriesListAction.java</code> with event name initList.	--	--

- After selecting the year and area click submit button, it shows the list of event details.
-

14.2.3 List Omnibus Requests

In this permission we can see the list of requests.

The screenshot shows a web application interface for managing events. At the top, there's a header with the guildKraft logo, current role 'ADMIN', membership ID '10000', and a user profile for 'SURESH BALABISEGAN'. Below the header is a sidebar with various menu items under 'WELCOME SURESH BALABISEGAN'. The main content area is titled 'MEETINGSLIST OF ENDORSED FORM' and displays a table with columns for 'Event ID', 'Status' (set to 'Approved'), 'Competition Name', 'Competition to be Held' (with a note 'No records are available'), 'View', and 'Approve'.  Facilities To Be Used Specifically For: CrossCountry Schooling Riding Clinics Stabling Other
 If Other Specify:

Publicity And Mailing List

Do you want Mailing List and Publications? Yes No

When publication deadlines allow, registered educational activities will be listed in Eventing USA and the Omnibus. Activities will be listed by name, date, and location with organizer's name and phone number.

The HLC will provide mailing lists electronically as a .csv electronic file that can be used in Word or Excel. If you cannot work with an electronic file, a hard copy list, on regular paper will be sent, which can then be copied onto 5160 label sheets. Mailing list requests must be made at least six weeks in advance.

Email HLC Logo to: Enter e-mail address
 (For Publicity Use Only)

Complementary Mailing List Format: Electronic file Hard Copy
 Send Mailing List by: Area State
 Enter Area: (E.g. 1,2,3,4)
 Enter State: (E.g. VA,MD,PA)
 Sort Mailing List by: Zip Alpha by last name

14.11.2 List Activity Request

It displays the list of Educational Activity meeting with its status.

Action	DB File	Table Name
frmMeeOrgEduActRegiListing.jsp file will call ActionMeeting.java with event name orgOwnList.	--	--

14.11.3 List User Request

=====Add=====

14.12 Manage Event Registration Price

14.12.1 List All Event Registration Price

Select “price type” and click “Submit” to view the list of Events.

The screenshot shows the 'MEETINGS: PRICE DETAILS LIST' page. At the top, there's a navigation bar with the guildKraft logo, current role 'ADMIN', membership ID '10000', and user name 'SURESH BALABISEGAN'. On the left is a sidebar with various administrative links. The main content area has a table with the following data:

Session	Due Date Price	After Due Date Price	View	Edit
Summer	250.0	0.0	[View]	[Edit]
Spring	250.0	0.0	[View]	[Edit]
Fall	100.0	0.0	[View]	[Edit]
Winter	250.0	0.0	[View]	[Edit]

At the bottom of the page, there's a footer with the text '© 2016 digitliz All Rights Reserved'.

Action	DB File	Table Name
<code>frmMeeEventRegPriceList.jsp</code> file will call <code>EventRegPriceAction.java</code> with event name initListPrice.	DBHelper.java will pass values and save in database table.	<code>tblMeeEventRegistrationPriceMaster</code> - displays the price types. <code>tblAdvIssueMaster</code> <code>tblMeeEventRegistrationPriceDetails</code> - displays the price details.

14.12.2

Set Event Registration Price

Fill the fields accordingly and click “Add” button.

The screenshot shows a web application interface for managing event registration prices. The top navigation bar includes the guildKraft logo, current role (ADMIN), membership ID (10000), and user name (SURESH BALABISEGAN). A sidebar on the left lists various administrative functions. The main content area is titled "MEETINGS: EVENT REGISTRATION PRICE DETAILS" and contains a form for "Add A Price Detail". The form fields are: Price Type (dropdown menu showing "Select One"), Season (dropdown menu showing "Select One"), Due Date Price (\$ [empty input]), and After Due Date Price (\$ [empty input]). At the bottom of the form are "Add" and "Cancel" buttons. A "Chat" window is visible on the right side of the screen.

Action	DB File	Table Name
<code>frmMeeEventRegPriceAdd.jsp</code> file will call <code>EventRegPriceAction.java</code> with event name initCreatePrice.	DBHelper.java will pass values and save in database table.	<code>tblMeeEventRegistrationPriceDetails - displays the price details.</code>

14.13 EDU Activity User Registration

14.13.1 Apply EDU Activity

It shows the list of activity requests. To Apply this click “Apply” button.

The screenshot shows a web application interface for managing EDU meetings. The top navigation bar includes the guildKraft logo, current role (ADMIN), membership ID (10000), and user name (SURESH BALABISEGAN). A sidebar on the left lists various administrative functions. The main content area is titled "MEETINGS: LIST OF EDU MEETINGS" and displays a table of EDU meetings. The table has columns: Meeting ID, Activity Name, Date to be Held, View, and Apply. A message at the top of the table area says "EDU Meetings placed by Organizers are listed below. To view the details, click on the 'View' button beside each record and to apply for the meeting click on the 'Apply' button." Below the table, it says "No records are available." A "Chat" window is visible on the right side of the screen.

Action	DB File	Table Name
frmMeeUserEduMeeListing.jsp file will call ActionMeeting.java with event name statusApproved.	--	--

14.13.2 List EDU Activity Requests

It shows the list of activity requests. To view this click “View” button.

Action	DB File	Table Name
frmMeeUserEduActInsureRegiListing.jsp file will call ActionMeeting.java with event name userStatus.	DBHelper.java will pass values and save in database table.	tblMeeEduActivityUserDetails

14.14 Manage Event Divisions

14.14.1 Add Event Divisions

Fill the fields accordingly and click “Create” button.

Action	DB File	Table Name
<code>frmMeeDivisionEventTypeCreate.jsp</code> file will call DivisionEventTypeMasterAction.java with event name add.	DBHelper.java will pass values and save in database table.	tblMeeEventDivisionMaster

14.14.2 List Event Divisions

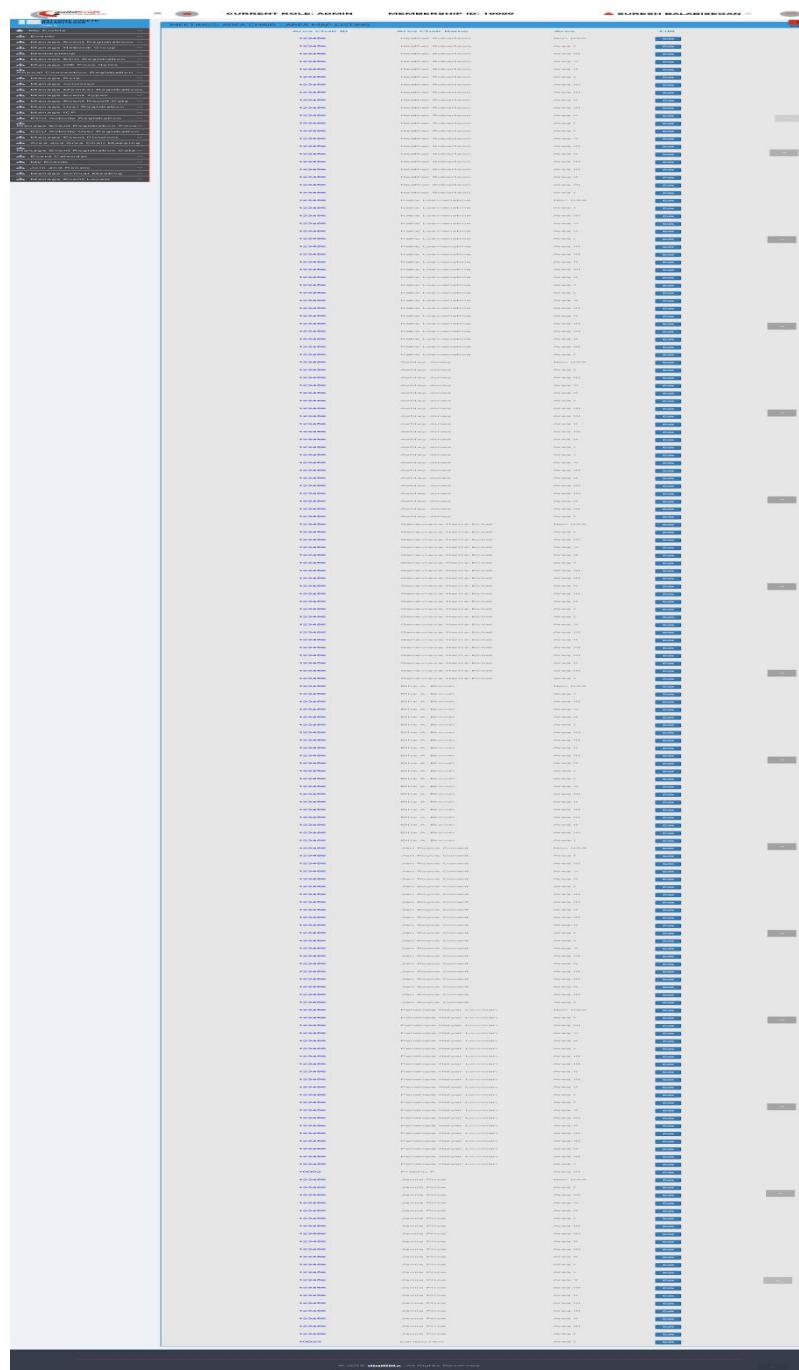

To edit an Event Type name click on 'Edit' button. To change the status click on the 'Activate/Deactivate' button.

Action	DB File	Table Name
<code>frmMeeDivisionEventList.jsp</code> file will call DivisionEventTypeMasterAction.java with event name list.	DBHelper.java will pass values and save in database table.	tblMeeEventDivisionMaster

14.15 Area and Area Chair Mapping

14.15.1 Listing Area Chair and Area Person

To edit Area chair id and area click on 'Edit' button.

Action	DB File	Table Name
<code>frmMeeACAreaMapListing.jsp</code> file will call <code>ActionEventOrgRenewal.java</code> with event name <code>mapAreaAndAreaChairListing.</code>	DBHelper.java will pass values and save in database table.	<code>tblMeeMapAreaChair</code> <code>tblMeeAreaMaster</code> <code>tblUserMaster</code>

14.15.2 Mapping Area Chair and Area Person

To map the area, to Area person fill the following fields and click “Assign” button.

Action	DB File	Table Name
<code>frmMeeMapACAreaMaster.jsp</code> file will call <code>ActionEventOrgRenewal.java</code> with event name <code>initMapAreaAndAreaChair</code> .	DBHelper.java will pass values and save in database table.	<code>tblMeeMapAreaChair</code> <code>tblMeeAreaMaster</code> <code>tblUserMaster</code>

14.15.3 Mapping Area State Zip

Mapping area according to state and zip code, fill the following fields and click “Submit” button.

Action	DB File	Table Name
<code>frmMeeMapAreaZip.jsp</code> file will call <code>ActionEventOrgRenewal.java</code> with event name <code>initMapStateZip</code> .	DBHelper.java will pass values and save in database table.	<code>tblMeeMapAreaChair</code> <code>tblMeeAreaMaster</code> <code>tblUserMaster</code>

The screenshot shows the GuildKraft application's administrative interface. The top navigation bar displays the current role as 'ADMIN' and membership ID as '10000'. The main content area is titled 'MEETINGS MAP AREA TO STATE & ZIPCODE' and contains a form for mapping areas to states and zipcodes. The sidebar on the left lists numerous administrative functions such as My Profile, Events, Manage Event Registrations, Manage Network Group, Membership, Manage EDU Registration, Manage OE Price Items, Annual Convention Registration, Manage Role, Manage consoles, Manage Member Registrations, Manage Event Types, Manage Event Result Data, Manage User Registration, Manage ICP, EDU Activity Registration, Manage Event Registration Price, Manage Event User Registration, Manage Event Divisions, Area and Area Chart Mapping, Manage Event Registration Data, Event Calendar, My Events, Join and Renew, Manage Annual Meeting, and Manage Event Levels.

14.16 Manage Event Registration Data

14.16.1 List Uploaded Event Registration Data

Shows the list of uploaded files, Click “MAP” button to map with the registered details. Click “VALIDATE” button to validate for qualification. Click “DELETE” button to the uploaded details.

Action	DB File	Table Name
<code>frmMemLstUploadReg.jsp</code> file will call <code>UploadRegDataAction.java</code> with event name <code>listUploadDetails</code> .	--	--

14.16.2 Map Event Level with Membership type

Here map the different Event Level for Each Membership Type.

14.19 Join and Renew

14.19.1 Join as Member

Here the User can become a Member by selecting the membership type and Continue with further processing.

The screenshot shows a web-based application interface for managing memberships. At the top, it displays the current role as 'ADMIN' and the membership ID as '10000'. On the right, there's a user profile for 'SURESH BALABISEGAN'. The main content area is titled 'MEMBERSHIP-MEMBERSHIP APPLICATION FORM'. It contains fields for 'MEMBERSHIP INFORMATION' and 'Membership Type'. There are two radio button options: 'Student Membership (Free for 1 year)' and 'Professional Membership (\$99 for 1 year)'. Below these, there's a checkbox for agreeing to 'Terms and Policy' and a link to 'I Agree to the digiBlitz Terms of Service and Privacy Policy.'. A large blue button labeled 'Become A Member' is at the bottom right. The left side features a vertical navigation menu with many items under 'My Profile' and 'Membership' categories, such as 'Manage Event Registrations', 'Manage Network Group', 'Manage Membership', 'Manage EDU Registrations', 'Annual Convention Registration', 'Manage Role', 'Manage controls', 'Manage Member Registrations', 'Manage Event Types', 'Manage Event Result Data', 'Manage User Registration', 'Manage ICP', 'EDU Activity Registration', 'Manage Event Registration Price', 'EDU Activity User Registration', 'Manage Event Divisions', 'Area and Area Chair Mapping', 'Manage Event Registration Data', 'Event Calendar', 'My Events', 'Join and Renew', 'Manage Annual Meeting', and 'Manage Event Levels'. At the bottom of the page, a copyright notice reads '© 2010 digiBlitz All Rights Reserved'.

Action	DB File	Table Name
<code>preMemberShip.jsp</code> file will call <code>GldkftMembershipRegistrationAction.java</code> with event name <code>preMemReg</code> .	GeneralDBAction.java will pass values and save in database table.	<code>tblMemberSubscription - displays all publication name</code>

14.19.2 Renew/Upgrade My Membership

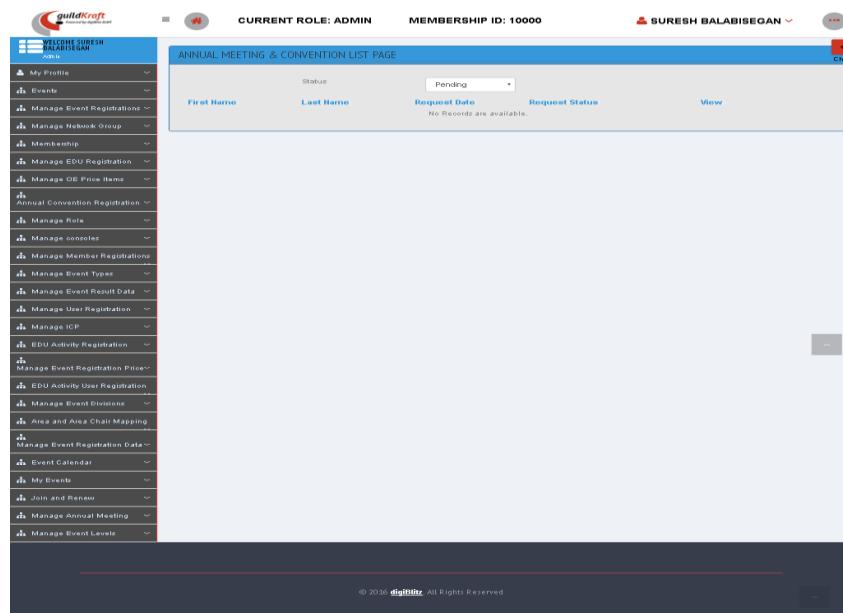

This page shows the Membership renewal and also payment information.

Action	DB File	Table Name
<code>memb-reg-ren-eligibility.jsp</code> file will call <code>GldkftMembershipRegistrationAction.java</code> with event name <code>renew</code> .	--	--

14.20 Manage Annual Meetings

14.20.1 List Annual Convention Registrations

Select the “Status” to see user requests.

Action	DB File	Table Name
<code>frmMeeAdminAnnConRegiListings.jsp</code> file will call <code>AdminAnnualRegListAction.java</code> with event name initAdminView.	--	--

14.20.2 List Annual Meeting price

Select event type and specifications to view the list of “price detail master”.

Action	DB File	Table Name
<code>frmMeeAdminAnnConPriceDetailListin gs.jsp</code> file will call <code>AddMeePriceDetailMasterAction.java</code> with event name initPriceList.	--	--

- To Edit the price details Click “EDIT” button and update with the new information.

Action	DB File	Table Name
frmMeeAdminAnnConPriceDetailEdit.js p file will call AddMeePriceDetailMasterAction.java with event name viewEditPriceList .	--	--

- To view the price details of that Event click “VIEW” Button.

Action	DB File	Table Name
frmMeeAdminAnnConPriceDetailView.jsp file will call AddMeePriceDetailMasterAction.java with event name viewEditPriceList .	--	--

14.20.3

Set Annual Meeting price

Fill the details given below and we can set meeting price for an event.

The screenshot shows the 'MEETINGS: PRICE DETAIL MASTER' page. The main form has the following fields:

- Event Type: Select One
- Specification: Select One
- Member Type: Select One
- Normal Price: \$ [input field]
- After Due Date Price: \$ [input field]

At the bottom are 'Add' and 'Cancel' buttons. The left sidebar has a navigation menu with items such as My Profile, Events, Manage Event Registrations, etc.

Action	DB File	Table Name
mee-price-detail-master-Ajax.jsp file will call AddMeePriceDetailMasterAction.java with event name addPriceMaster.	--	--

14.20.4

Set Annual Meeting Registration Date

To create a meeting, fill the start date, end date and no of days then click “Set Date” to create a meeting.

Action	DB File	Table Name
frmMeeAdminSetDateMaster.jsp file will call AdminSetDateMasterAction.java with event name adminSetDateProcess.	--	--

In Yearly sales report, fill the details given below and then click “submit” button. It will generate the graph given below.

The screenshot shows the 'MONTHLY SALES REPORT' page. On the left, there's a sidebar with 'WELCOME SURESH BALABISEGAN Admin' and 'My Profile' and 'Manage Additional Reports' options. The main area has three dropdown menus: 'Select Year' (set to 2006), 'Payment Mode' (set to Visa), and 'Report type' (set to Graphical). Below these is a 'Graph types' section with four radio buttons: 'Pie' (selected), 'Line', 'Bar', and 'Pyramid'. At the bottom is a blue 'Submit' button. The footer says '© 2016 digitBIZ All Rights Reserved'.

Action	DB File	Table Name
createAreaGraph.jsp file will call GldkftareaGraph .java with event name area_yearly	--	--

20 Role Management

Role management helps you manage authorization, which enables you to specify the resources that users in your application are allowed to access. Role management lets you treat groups of users as a unit by assigning users to roles such as manager, sales, member, and so on. (In Windows, you create roles by assigning users to groups such as Administrators, Power Users, and so on.).

20.1 Manage Mapping

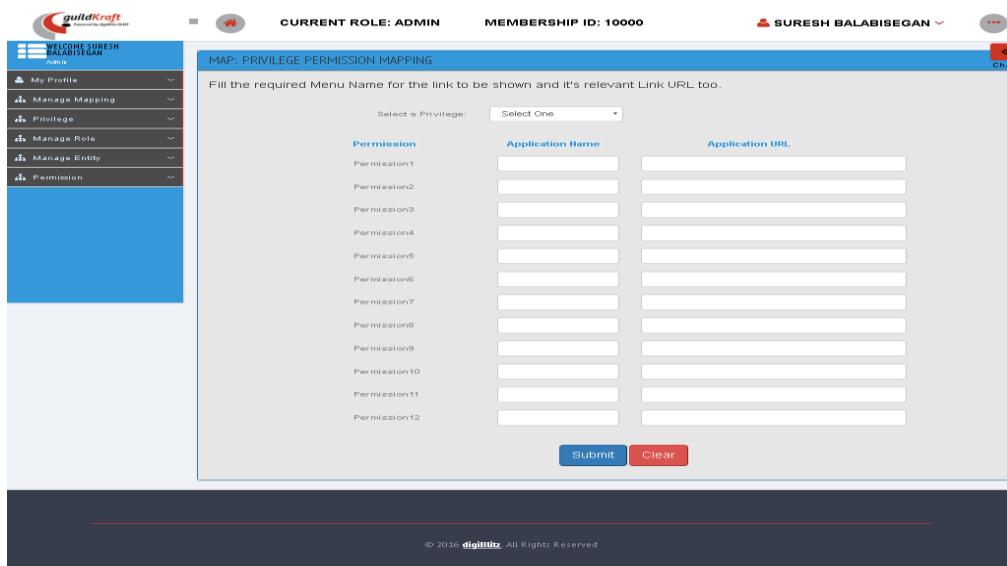

20.1.1 Mapping Entity with Privileges

You can map a Privilege or Multiple Privileges for a given Entity as shown below.

Action	DB File	Table Name
<code>frmRolMRoleMapping.jsp</code> file will call <code>KlgRoleAction.java</code> with event name <code>initEntPriv</code>	GeneralDBAction.java will pass values and save in database table.	<code>tblMapEntity</code> <code>tblMapUserPrivilege</code> <code>tblMapRole</code> <code>tblRoleMaster</code>

20.1.2 Mapping Privileges with Permission

Fill the required Menu Name for the link to be shown and it's relevant Link URL too and then click submit button.

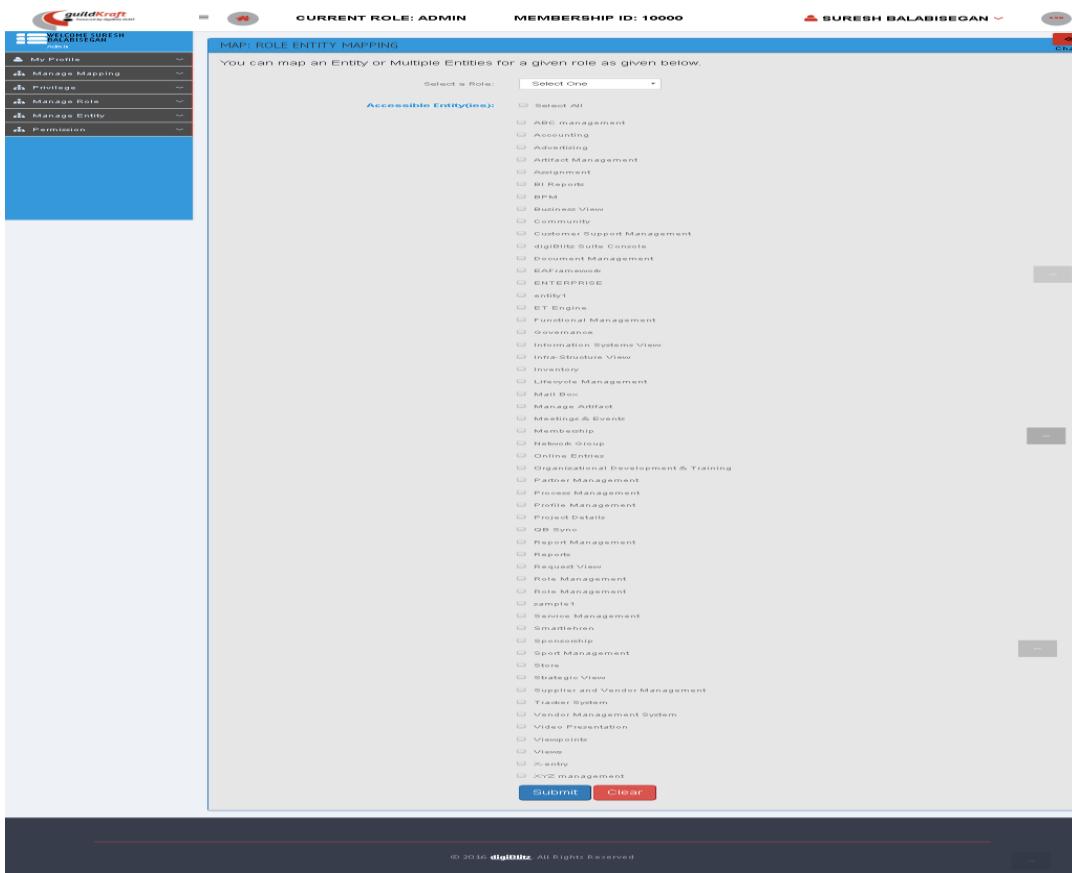

The screenshot shows a web application interface for managing privilege mappings. At the top, there's a header with the guildKraft logo, user information (CURRENT ROLE: ADMIN, MEMBERSHIP ID: 10000), and a user dropdown (SURESH BALABISEGAN). On the left, a sidebar menu includes 'My Profile', 'Manage Mapping', 'Privilege' (which is currently selected), 'Manage Role', 'Manage Entity', and 'Permission'. The main content area has a title 'MAP: PRIVILEGE PERMISSION MAPPING' and a sub-instruction 'Fill the required Menu Name for the link to be shown and it's relevant Link URL too.' Below this is a table with three columns: 'Permission' (list of 12 permissions from 'Permission1' to 'Permission12'), 'Application Name' (empty input fields), and 'Application URL' (empty input fields). At the bottom of the table are 'Submit' and 'Clear' buttons. The footer contains a copyright notice: '© 2016 digitize All Rights Reserved'.

Action	DB File	Table Name
<code>frmRolMpriviPermissionMapping.jsp</code> file will call <code>KlgRoleAction.java</code> with event name <code>initPrivPermission</code>	GeneralDBAction.java will pass values and save in database table.	<code>tblPrivilegeMaster</code> - get all privilege name <code>tblPermissionMaster</code> - stores all permission name <code>tblMapPermission</code>

20.1.3 Mapping Role with Entities

You can map an Entity or Multiple Entities for a given role as given below.

Action	DB File	Table Name
frmRoleEntityRoleMapping.jsp file will call KlgRoleAction .java with event name initRoleEnt	GeneralDBAction.java will pass values and save in database table.	tblEntityMaster - get all entity [tblMapEntity tblMapUserPrivilege tblMapRole tblRoleMaster] - get all roles

20.1.4 Mapping Role with entities and Privileges

Check the required 'Permissions' to be given for a selected 'Privilege' and corresponding 'Entity'.

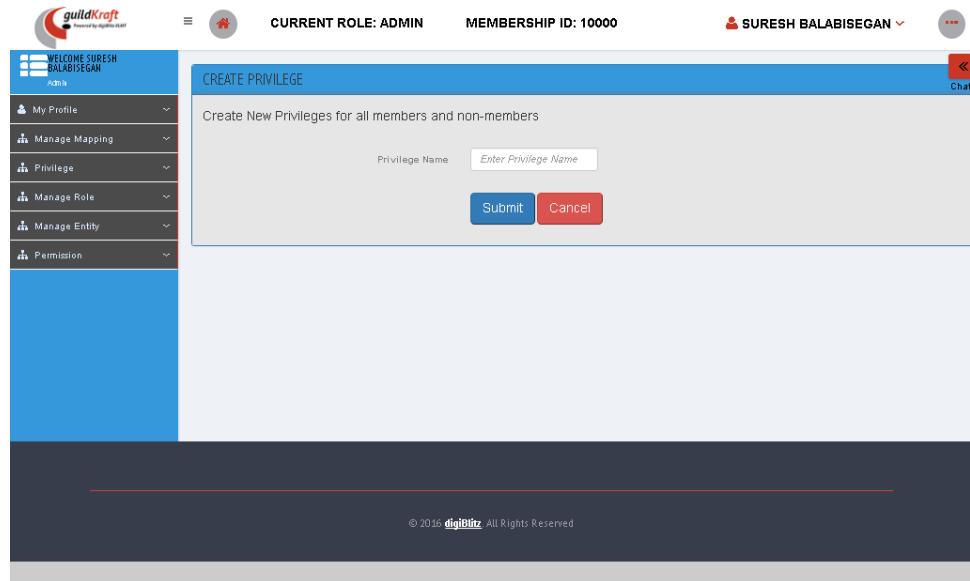

Action	DB File	Table Name
frmRoleMapping.jsp file will call <code>KlgRoleAction</code> .java with event name <code>initRoleEntPriv</code>	GeneralDBAction.java will pass values and save in database table.	<code>tblEntityMaster</code> - get all entity <code>[tblMapEntity</code> <code>tblMapUserPrivilege</code> <code>tblMapRole</code> <code>tblRoleMaster]</code> - get all roles

20.2 Privileges

20.2.1 Create privileges

Enter privileges and then click “create” button to create privileges.

Action	DB File	Table Name
frmRoleMCreatePrivileges.jsp file will call <code>KlgRoleAction</code> .java with event name <code>initCreatePriv</code>	GeneralDBAction.java will pass values and save in database table.	<code>tblPrivilegeMaster</code>

20.2.2 Edit List of Privileges

You are viewing the list of **Privileges** created by you. To edit a privilege click on the **Edit** button beside each record.

Action	DB File	Table Name
frmRoleListPrivileges.jsp file will call KlgRoleAction.java with event name privList	GeneralDBAction.java will pass values and save in database table.	tblPrivilegeMaster - get all privilege name

20.3 Manage Role

20.3.1 Assign Roles Securities

To assign role and entities select the role and entity and then click submit button.

CURRENT ROLE: ADMIN MEMBERSHIP ID: 10000 SURESH BALABISEGAN

MAP: ROLE, ENTITY, PRIVILEGE, PERMISSION MAPPING

Check the required 'Permissions' to be given for a selected 'Privilege' and corresponding 'Entity'.

Note: Please select at least one required permission for the corresponding privilege otherwise Privilege and Permission will not be mapped.

Select an Role: Select One

Select A Entity: Select One

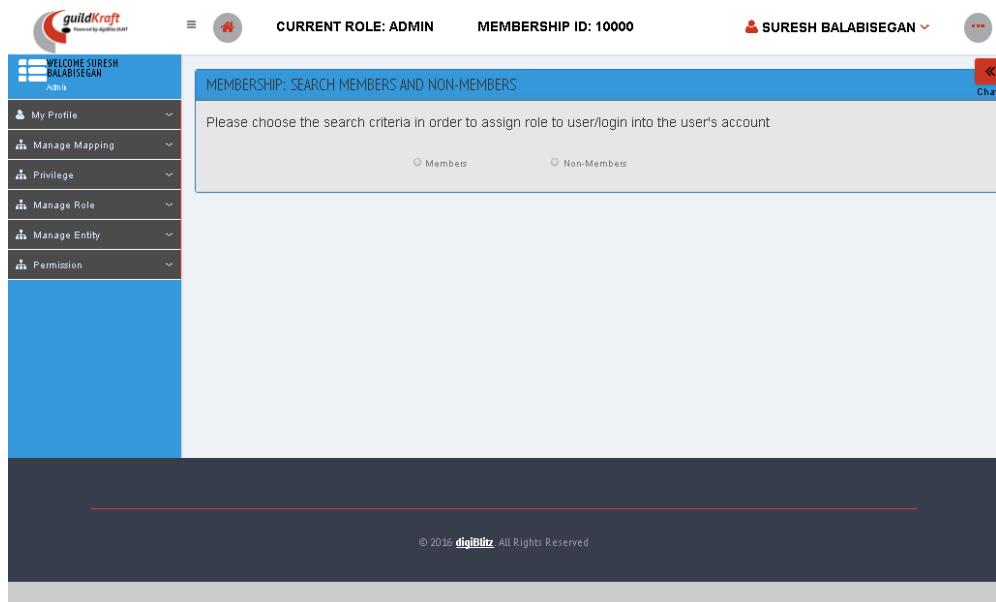

No Privileges are Available.

Submit Clear

Action	DB File	Table Name
<code>frmRoleMapping.jsp</code> file will call <code>KlgRoleAction.java</code> with event name <code>initRoleEntPriv</code>	GeneralDBAction.java will pass values and save in database table.	<code>tblEntityMaster</code> - get all entity <code>[tblMapEntity</code> <code>tblMapUserPrivilege</code> <code>tblMapRole</code> <code>tblRoleMaster]</code> - get all roles

20.3.2 Assign Roles To User

Choose the search criteria in order to assign role to user/login into the user's account.

Action	DB File	Table Name
<code>frmMemberSearchList.jsp</code> file will call <code>KlgSearchAction.java</code> with event name <code>initViewDet</code>	GeneralDBAction.java will pass values and save in database table.	[tblMapEntity tblMapUserPrivilege tblMapRole tblRoleMaster] - get all roles with respect to user ID to search a user

20.3.3 Maintain Roles

You are viewing the list of Roles created by you. To create a Role click **Add** button. To edit a Role select the checkbox before each record and then click on the **Edit** button. To delete Roles select the checkbox(s) before each record and then click on the **Delete** button.

Action	DB File	Table Name

[<code>tblEntityMaster</code> - get all entity <code>tblMapEntity</code> <code>tblMapUserPrivilege</code> <code>tblMapRole</code> <code>tblRoleMaster</code>] - get all roles

20.4 Manage Entity

20.4.1 Create Entities

Create an Entity for all the departments using our Online Services Dashboard, right here.

The screenshot shows the guildKraft Online Services Dashboard. At the top, it displays the current role as 'ADMIN' and membership ID '10000'. The main header says 'CREATE AN ENTITY'. Below it, a sub-instruction reads 'Create an Entity for all the departments using our Online Services Dashboard, right here!'. There is a text input field labeled 'Entity Name:' with a placeholder 'Entity Name:'. Below the input field are two buttons: 'Create' (blue) and 'Clear' (red). On the left side of the dashboard, there is a sidebar with a blue header 'WELCOME SURESH BALABISEGAN Admin' and a list of menu items: 'My Profile', 'Manage Mapping', 'Privilege', 'Manage Role', 'Manage Entity', and 'Permission'. The main content area has a dark grey footer bar at the bottom containing the text '© 2016 digiBIZZ. All Rights Reserved'.

Action	DB File	Table Name
